TECHNICAL SKILLS

Languages: Go, C#, Java, TypeScript, JavaScript, Dart, SQL
Backend: .NET, Go, Node.js, Express.js, REST APIs, RabbitMQ, MassTransit, microservices
Frontend: React.js, AngularJS, Flutter
Testing: Patrol, JUnit, Jest, RestAssured, test-driven development
Data: PostgreSQL, MySQL, MongoDB
Tools: Git, Docker, AWS, CI/CD pipelines, Postman, JIRA
Languages spoken: English, French, Arabic, Armenian (fluent)

PROFESSIONAL EXPERIENCE

Genetec — Montreal, Canada

Software Developer, Go

Aug 2026 – Present

- Building an API gateway in **Go** that exposes internal platform services as public APIs on the **Security Center SaaS** product, opening the platform to customer and third-party integrations.
- Developing the accompanying **React** interface for configuring and inspecting the endpoints published through the gateway.

Software Developer in Test

Jan 2026 – Aug 2026

- Built end-to-end test automation for the **Security Center SaaS** mobile platform in **Flutter, Dart, and Patrol**, automating 15+ core user flows previously covered only by manual QA.
- Established the mobile test infrastructure from scratch: provisioned a **Mac Mini** as a dedicated CI agent and built a pipeline that runs the full suite on every pull request.
- Parallelized test execution across jobs, cutting suite runtime by **60%** and keeping PR feedback fast as coverage grew.
- Developed an internal **Claude Code** skill that generates Patrol test suites from written test cases across multiple repositories, replacing manual authoring.

DataAnnotation — Montreal, Canada

Aug 2025 – Dec 2025

Freelance Software Developer

- Built tools and scripts to evaluate large language model output on summarization, question answering, and code generation, producing structured judgments used as training signal.

Dormakaba — Montreal, Canada

QA Automation Intern

May 2025 – Aug 2025

- Ported the existing automation tooling from **Windows to Linux** to run on Raspberry Pi 4 hardware.
- Built automated audit-report tests using **Java and RestAssured**.

C# Development Intern

May 2024 – Dec 2024

- Developed and maintained backend APIs in **C# and .NET** across a microservice architecture communicating over a **RabbitMQ** bus.
- Researched library-version compatibility and led the upgrade, gaining up to **30% in message throughput**.

Pratt & Whitney Canada — Longueuil, Canada

May 2023 – Aug 2023

Programmer Analyst Intern

- Evaluated messaging technologies (**RabbitMQ, Amazon SNS, SQS**) for interservice communication and prototyped **.NET** microservices to compare them.
- Contributed to reference-architecture reviews with solution architects, replacing custom in-house libraries with market-standard ones.

CAE — Montreal, Canada

Sep 2022 – Dec 2022

Full Stack Developer Intern

- Rebuilt an internal inventory management system using **React.js, .NET, and SQL**, increasing adoption among factory-floor employees.

PROJECTS

Courtsy — Multi-tenant SaaS booking platform and CRM for sports complexes

React, .NET, PostgreSQL

- Independently designed, built, and deployed Courtsy, a multi-tenant sports facility booking and CRM platform using **React, .NET, Docker, and PostgreSQL**.
- Designed custom token-based authentication with **role-based access control** and a resource-ownership resolver that prevents **IDOR** across tenant boundaries.

EDUCATION

McGill University — Graduate Certificate in Cybersecurity (GPA 4.0)

2025 – 2026

Concordia University — B.Eng. Software Engineering, With Distinction (Co-op)

2021 – 2025

Collège de Bois-de-Boulogne — DEC, Computer Science and Mathematics

2019 – 2021
